

## Flow2A Drive unit

We are pleased to announce our latest product development - the next generation of our Flow2 curved stairlift, featuring the new Flow2A drive unit ('Apollo'). This new unit was developed with customers in mind, overcoming their questions and challenges with unmatched innovation, quality and functionality.

### What is the Flow2A?

The Flow2A is the existing Flow2 stairlift with a new eco-efficient drive unit, and has been engineered using the latest advancements in technology. Flow2 has long been one of the most innovative stairlifts on the market and will continue to be so with the introduction of the Flow 2A drive unit.

### How will your customers benefit?

- Improved energy consumption by more than 50% resulting in 2-3 times more rides on average without battery charge.
- Quieter operation with high frequency noise level reduced.
- Stiffer casting resulting in a more stable feel on rail.
- More robust when using a vertical start and on the highest speed track.
- Smoother travel along the rail.

### How will you and your engineers benefit?

- Single piece aluminium casting resulting in a lighter chassis.
- New controls and more features in the service menu.
- Improved software containing up-to-date safety features.
- New motors (including swivel motor and gear box).
- Backwards compatibility with the current Flow2 model.
