"The Orion R350 is the largest of all our residential lifts with a travel of up to 7.1 metres (4 levels)." Perfect for residential premises, offers quality, reliability and safety. "

Built to Australian Standard 1735 parts 16 & 18, the Orion R350 lift whether it be for your new or existing home.

Offering an alternative to the costly expense associated with providing load bearing walls, large slab footings and a machine room, the Orion R350 comes complete with it's own light-weight self supporting lift shaft, sliding landing doors and machine cabinet.

Capable of servicing up to four levels with a maximum travel of 7.1 metres, the Orion R350 is powered by an advanced chain-over oil hydraulic drive system that requires no over head space or structural support.

Requiring only days to install, the Orion R350 lift is built in Australia, which results in very short lead times. Rated for 350kgs, the Orion R350 can easily carry three people and has a clear floor space of 1200mm x 1400mm x 2100mm.

Cost Effective

- ▶ Self-supporting lift tower - no load bearing walls required
- ▶ No separate machine room construction required
- ▶ Only 150mm pit depth
- ▶ Low installation / construction costs
- ▶ Low running costs / power consumption
- ▶ Single phase 240v power
- ▶ Once a year maintenance
- ▶ Suitable for internal or external installation

Safety

- ▶ Reliable dual oil hydraulic chain-over cylinders
- ▶ Emergency lift car lighting - in the event of power failure
- ▶ Automatic battery backup lift car lowering system
- ▶ Additional manual lowering facilities
- ▶ Emergency stop button, alarm and phone
- ▶ Key lockable push button controls
- ▶ Automatic homing of the lift car

Peace of Mind

- ▶ Manufactured by a family owned and operated company
- ▶ Australian made to Australian Standards
- ▶ Built to superior specifications using quality materials
- ▶ Warranty on parts and labour
- ▶ Lift delivered, installed & tested by qualified lift technicians
- ▶ Custom built to your specification
- ▶ Lift shaft can be finished to match existing architecture
- ▶ Unrivalled after-sales service

LIFT TOWER

Built as a free-standing, self-supporting unit and weighing approx 950kg, the lift tower is fabricated from aluminium and comes complete with sliding doors, door jambs, flashings, electrical wiring and hydraulic cylinders.

Depending on space and architectural needs, the lift shaft can be set up for cladding to be applied directly to it's framework. The Orion R350 lift tower can be easily incorporated into a new or existing building, whether it be positioned internally or externally.

LIFT CAR

Available in two styles of configuration:

- ▶ Single entry "A Model" with entry and exiting on the same side
- ▶ Dual entry "B Model" with entry at the front and exiting via the rear.

Car size is as follows:

- ▶ Both configurations 1200 x 1400 x 2100

Why buy Australian Made?

- ▶ Built to Australian Standards
- ▶ Confidence in Quality
- ▶ Short lead times
- ▶ Parts readily available
- ▶ Jobs created in Australia
- ▶ Supporting Australian Economy
- ▶ Profits remain in Australia

LIFT CAR INTERIOR

Standard option is for the fabricated aluminium lift car frame to be internally sheeted with white laminated panels with a shadow line. These panels are removable, thus allowing the cosmetics of the lift to be changed.

The ceiling panels are also fitted with a shadow line.

Our standard inclusion for the car floor is a grey/charcoal indoor outdoor carpet. If wanted, we can leave the floor bare for the client to fit an alternative floor covering.

Standard car features include:

- ✓ Grey control panels with square stainless steel buttons
- ✓ Internal controls of GR, 1, alarm, emergency stop
- ✓ Engraved load plate
- ✓ Stainless steel handrail
- ✓ Non-slip grey/charcoal indoor outdoor carpet
- ✓ Emergency telephone
- ✓ 4 recessed LED down lights
- ✓ Lift car door

LANDING DOORS

Fitted with stainless steel sliding doors, the whole assembly is part of the lift shaft.

Swipe card security devices can be added to the landing doors as an optional extra.

Door size is: 900mm wide x 2000mm high.

LANDING CONTROL STATIONS

Mounted to the front of the lift and onto your choice of a grey or stainless steel panel to enable you to call the lift from each landing.

For securing the lift against unwanted users, each station control is fitted with an isolating key switch. Used in conjunction with the parking facility, the lift car will position itself just above the lower landing, preventing either of the landing doors from opening. This command can be overridden at either landing by keying the lift back on.

MACHINE CABINET

The Orion R350 uses a separate lift machine cabinet that creates a more compact lift shaft design and eliminates costly machine room construction.

Fabricated from metal and powdercoated, to withstand the external elements, the cabinet is mounted at the ground level for easy access for emergency and maintenance purposes.

Provided with a key lockable door, the cabinet contains the hydraulic power unit, hydraulic control valves, electrical control board, emergency power supply, cabinet light, emergency tools and instructions.

INSTALLATION

Supplied assembled & pretested, the design of the Orion R350 allows for easy installation by either craning in or dismantle and re-assemble in your home.

Able to be installed within 3 - 4 days, the Orion R350 is perfect for new or existing buildings as time on site is minimal.

ELECTRICAL REQUIREMENTS

The Orion R350 only requires a 32amp RCD protected single phase power circuit. The lift mains do not require fire rating so the lift can be fed from a local sub board.

MAINTENANCE

For optimum performance, reliability and long term use, the lift should be serviced every 12 months by an approved lift technician.

WARRANTY

For all warranty enquiries, please check with your local Aussie Lifts dealer.
